

How To Get Discounts On Amazon By Paying With Bitcoin

By Chris Coney

Bitcoin is a new technology that is creating opportunities that are not just new, they were not even possible before.

For example, have you ever got to the checkout on Amazon and seen 'Bitcoin' as a payment option?

Neither have I, because **they don't currently take Bitcoin as payment.**

Hold on a sec Chris! You wrote the title of this document in a huge font **and now you're telling me Amazon don't take Bitcoin?**

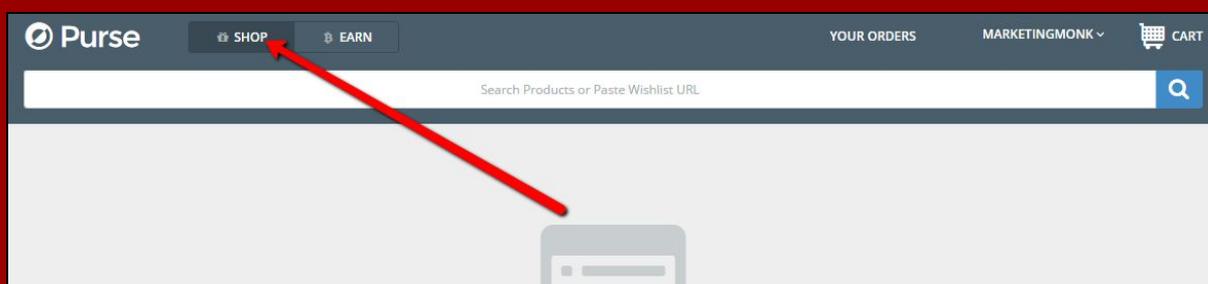

Yes I am, although I'm still going to deliver on the promise of showing you how to **get discounts of up to 25% on everything** you buy from now on.

Did you know there are literally **billions of dollars** worth of Amazon Gift Cards out there that haven't been used? These people would love to sell their gift cards but Amazon doesn't allow it.

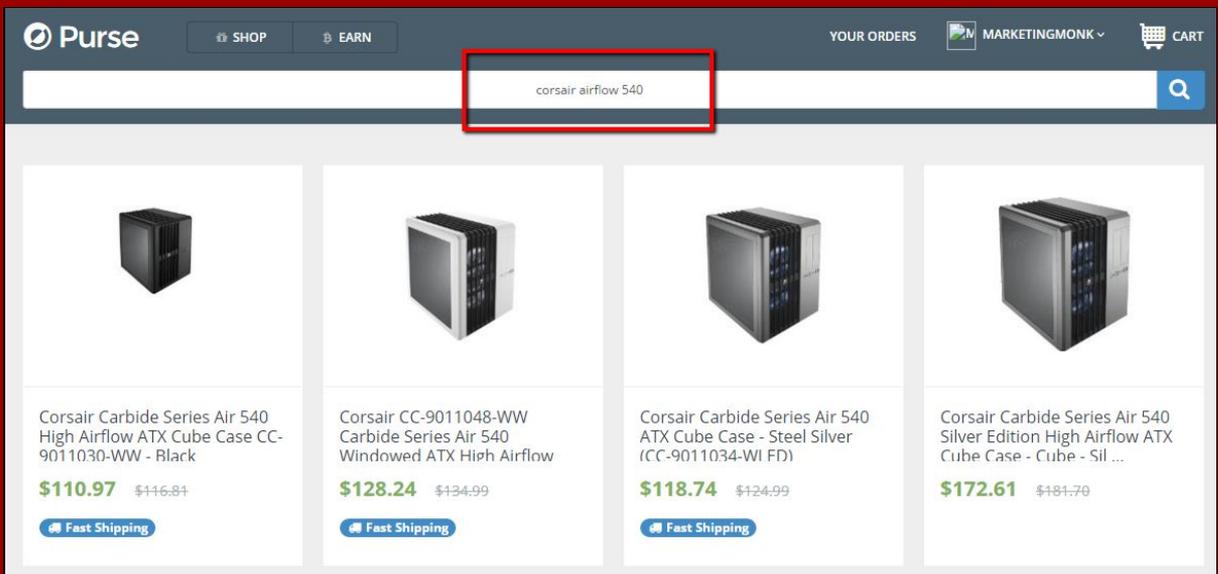

Amazon do however, allow you to **buy stuff for other people** with gift cards.

Here's how we use this knowledge to get discounts:

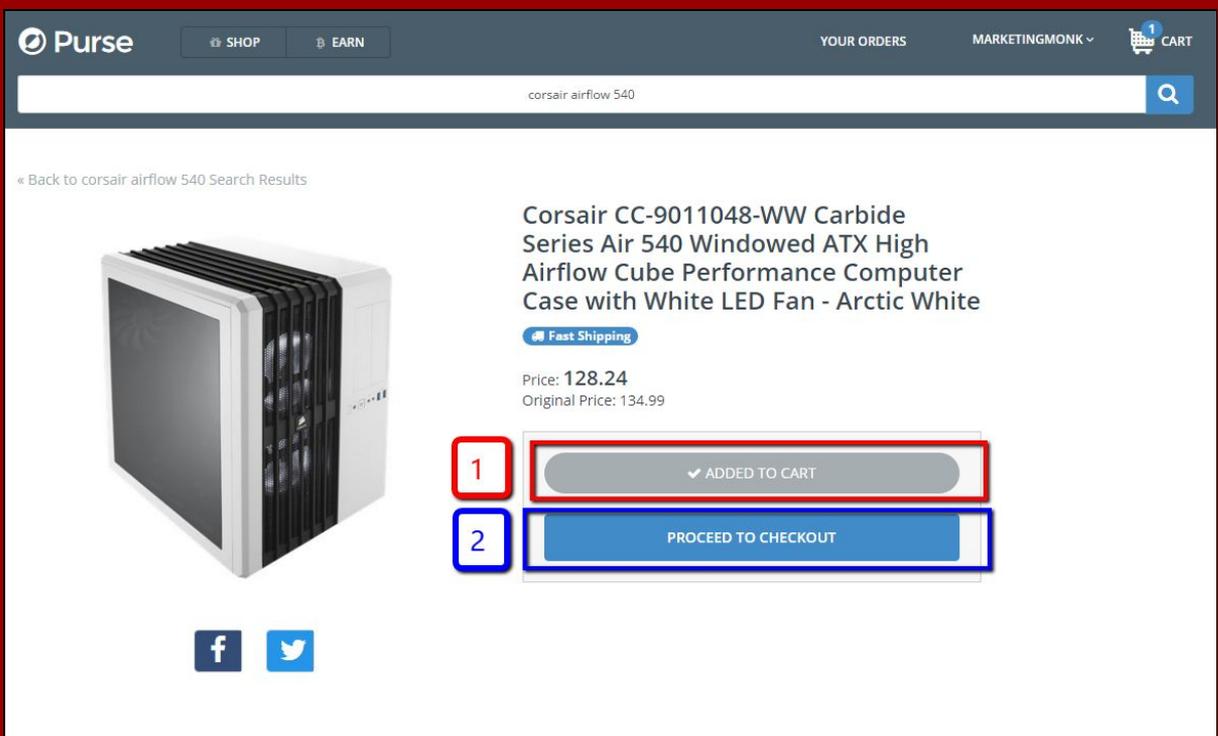

1. Go to <https://purse.io/>
2. Sign up for a free account then log in
3. Make sure you are on the 'Shop' tab:

4. Type the item you want to buy into the search box then click on it in the search results:

5. Click add to cart then proceed to checkout:

6. Enter your shipping details:

That's in. In this example I got an immediate discount of 5%.

Wait a minute! You told me I could get up to 25% discount by paying with Bitcoin?

Yes you can do that but the bigger discount you ask for, the longer you may have to wait.

That's because if you order a \$100 item and want to pay \$75 for it, someone with \$100 of Amazon gift cards has to be willing to lose 25% of the value in order to convert the gift card into Bitcoin (which you send them as part of the transaction).

Are people willing to do this? Yes, every day thousands of orders go through Purse.io, just click on the 'Earn' tab at the top and see for yourself.

My feeling is that this is incredibly cool and I hope you enjoy using it.
